

BROOKFIELD R-III SCHOOL DISTRICT

Tyler SISK12 and Infinite Campus Conversion

May 11th, 2023

Dear Parents, Students, and Staff,

This summer the Brookfield R-III School District will be switching from the current student information system known as Tyler SISK12 to Infinite Campus. Tyler SISK12 has discontinued their product; therefore, multiple districts throughout the state of Missouri have, or will be making system changes in the near future. What does this effect?

Parent Portal/Student Portal:

Parent Contact Information/Student Registration Information/Grades/Credits/Lunch Balances, etc. Data will be migrated from Tyler SISK12 to Infinite Campus, and some data may take time to be fully accessible. Access to the portal will be established in June or early July for all users, with the expectation of online registration in late July. There will also be a new app for accessing the portal on a mobile device.

Text Alerts:

This summer the text messaging system will also be changed from the current platform to the built-in feature included in Infinite Campus. This will improve efficiency by eliminating the need to maintain two different systems.

More information will be sent out with how-to guides later this summer. Upon logging into the new system, there will be a possibility that there are errors in some data due to the conversion/migration. The District will provide a way for reporting those errors so they can be corrected in the system as soon as possible.

We appreciate your understanding during this change!

Sincerely,

Matt Anderson
Director of Technology
